DISA
DEFENSE INFORMATION SYSTEMS AGENCY
The IT Combat Support Agency

Fourth Estate Network Optimization
Defense Enclave Services

Serve as a single network with a single service provider (DISA), to enable cost efficiencies, drive service excellence and mitigate risks.

OVERVIEW

As threats within the cyberspace domain become increasingly sophisticated, DoD is looking for solutions to eliminate unnecessary complexity within the information technology space. The Deputy Secretary of Defense designated the Defense Information Systems Agency as the single service provider to optimize network capabilities for Fourth Estate Defense Agencies and Field Activities. DISA's role in providing Fourth Estate Network Optimization will transfer many of the Fourth Estate DAFAs from common-use IT services and assets into a single service provider environment. This optimization effort will modernize the DoD IT architecture, reduce costs, improve business practices and mitigate operational and cyber risks.

DEFENSE ENCLAVE SERVICES BENEFITS

- Modern infrastructure
- Secure, expandable infrastructure and cost-effective solutions
- Secure, efficient and flexible solution for premise, mobile and remote access requirements
- Threat protection
- Latest IT equipment and personnel skills for network optimization
- Scalable, cost-effective user environment

MIGRATING DEFENSE AGENCIES AND FIELD ACTIVITIES

- Defense Information System Agency
- Defense Technical Information Center
- Defense POW/MIA Accounting Agency
- Defense Media Activity
- Defense Microelectronics Activity
- Defense Manpower Data Center
- Defense Contract Management Agency
- Defense Finance and Accounting Service
- Defense Threat Reduction Agency
- Defense Contract Audit Agency
- Defense Logistics Agency
- Defense Advanced Research Projects Agency
- Missile Defense Agency
- Defense Health Agency
