

Defense Information Systems Agency
A Combat Support Agency

Future Commercial Satellite Communications (COMSATCOM) Services Acquisition (FCSA)

Transponded Capacity (Fixed Satellite Services)

Dedicated satellite bandwidth and power in any commercially available frequency band via

General Services Administration (GSA) IT

Schedule 70 SIN 132-54

SIN 132-54 Features

- Customer Funding Method: Military Interdepartmental Purchase Request (MIPR)
- COMSATCOM transponded capacity refers to satellite bandwidth and power only
- Provides dedicated bandwidth and power on a communications satellite in any available COMSATCOM frequency band, including, but not limited to, L-, S-, C-, X-, Ku-, extended Ku-, Ka-, and UHF
- Allows customers to use the FSS, including: limited engineering (e.g., development of link budgets, transmission plans); basic customer training (e.g., acquiring satellite signal, peak and polarization); core management and control of the transponded capacity; and required approvals (e.g., frequency clearances, landing rights)
- Host Nation Agreements (HNAs) will be priced separately when required
- Requirements range from small fractions of a single transponder within a single coverage area to multiple transponders on multiple satellites with worldwide coverage for short durations measured in hours or days to long durations measured in years

SIN 132-54 Features *(continued)*

- NOTE: Equipment is available for purchase under SIN 132-8 or 132-9 or for lease under SIN 132-3 or short term rental under 132-4.
